Guidance by the Sustainability Programme

- Sustainability requirements in land allocation
- Political will
- Shared vision
- Leadership
- Resources
- Openness to innovation – "learning by doing"
- Communication

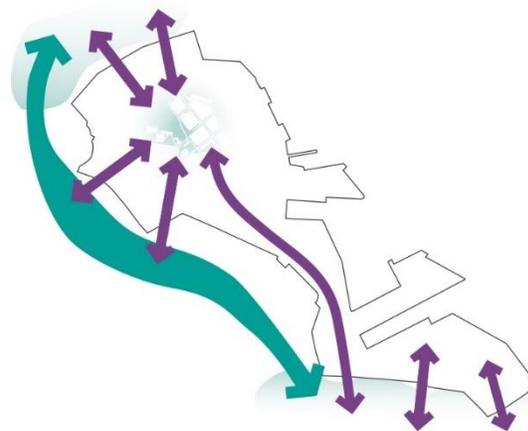

The third version of the programme was decided by the City Council in 2021

Five goals

Let nature do the work

Staffan Lorenz projektchef Norra Djurgårdsstaden

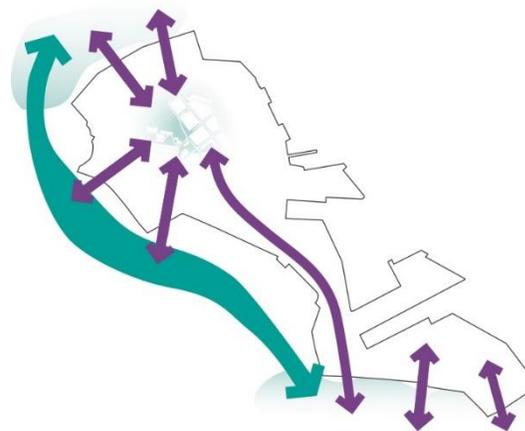

svt

De här är jättedjupa och breda.
De kan ta in väldigt mycket regnvatten.

So far:

- ✓ 140 000 m² new green space
26 400 m² green roofs
and 47 300 m² courtyards
- ✓ 600 new trees, have been planted in public open space of which **120 are oak trees**
- ✓ 98% of the developers have achieved the Green Space Index.

Multifunctional green spaces

Resource efficiency and reduced climate impact

✓ **All new buildings are low-energy buildings.**

✓ The waste system consists of a vacuum waste collection system, a recycling room, an automated collection point for hazardous waste, and the mobile Pop-up Reuse Centre.

✓ Ongoing electrification. 43% of the fuel used for construction machinery and vehicles in the construction projects during 2022 has been renewable.

✓ 40% of the rock and excavation materials have been reused, which amounts to 945,000 tonnes.

✓ **1/3 of the area remediated.**

Waste management

Energy and Climate

Sun, wind and water at the terminal

Green roofs handle stormwater and convert carbon dioxide into oxygen, creating a multifunctional space accessible to all. Solar panels provide electricity to the building and terminal walkways. Seawater and solar energy can be used for both heating and cooling.

Värtaverket

BECCS

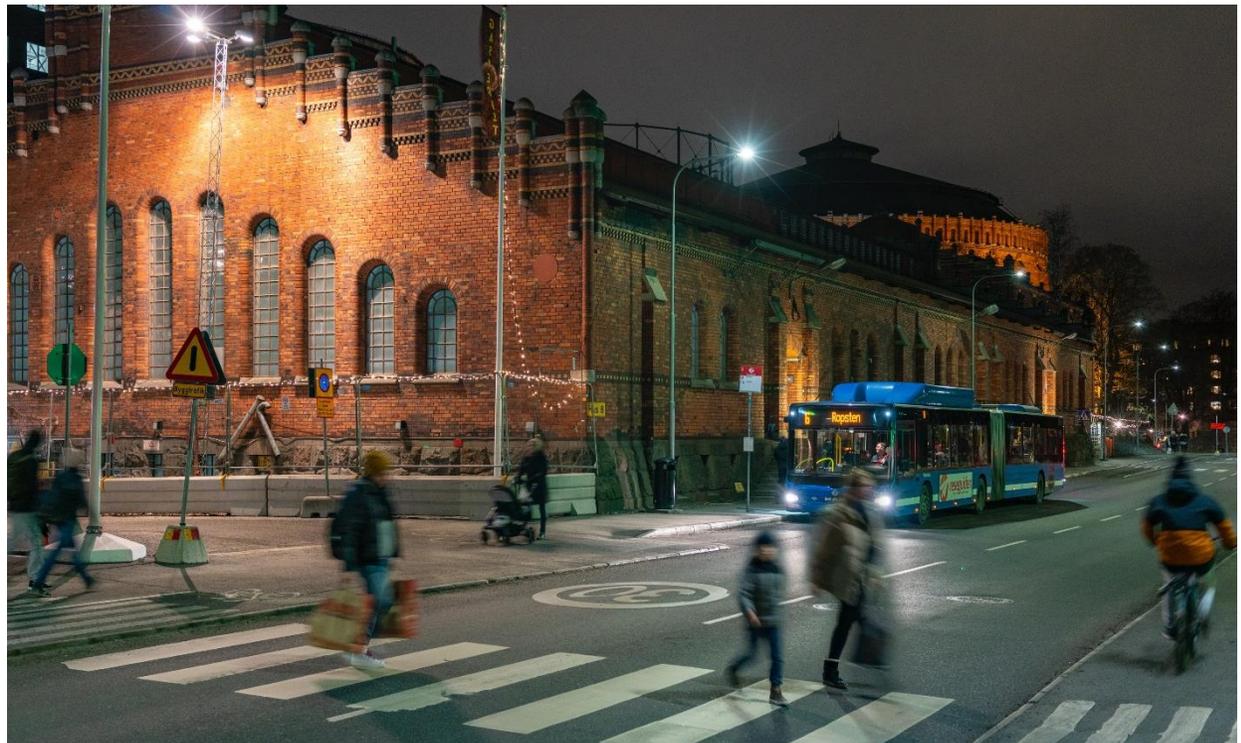

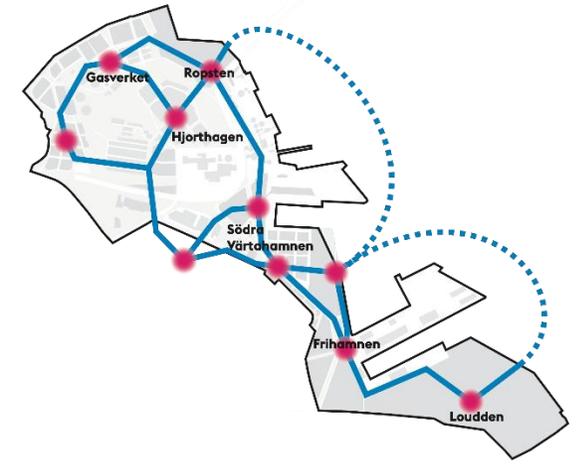

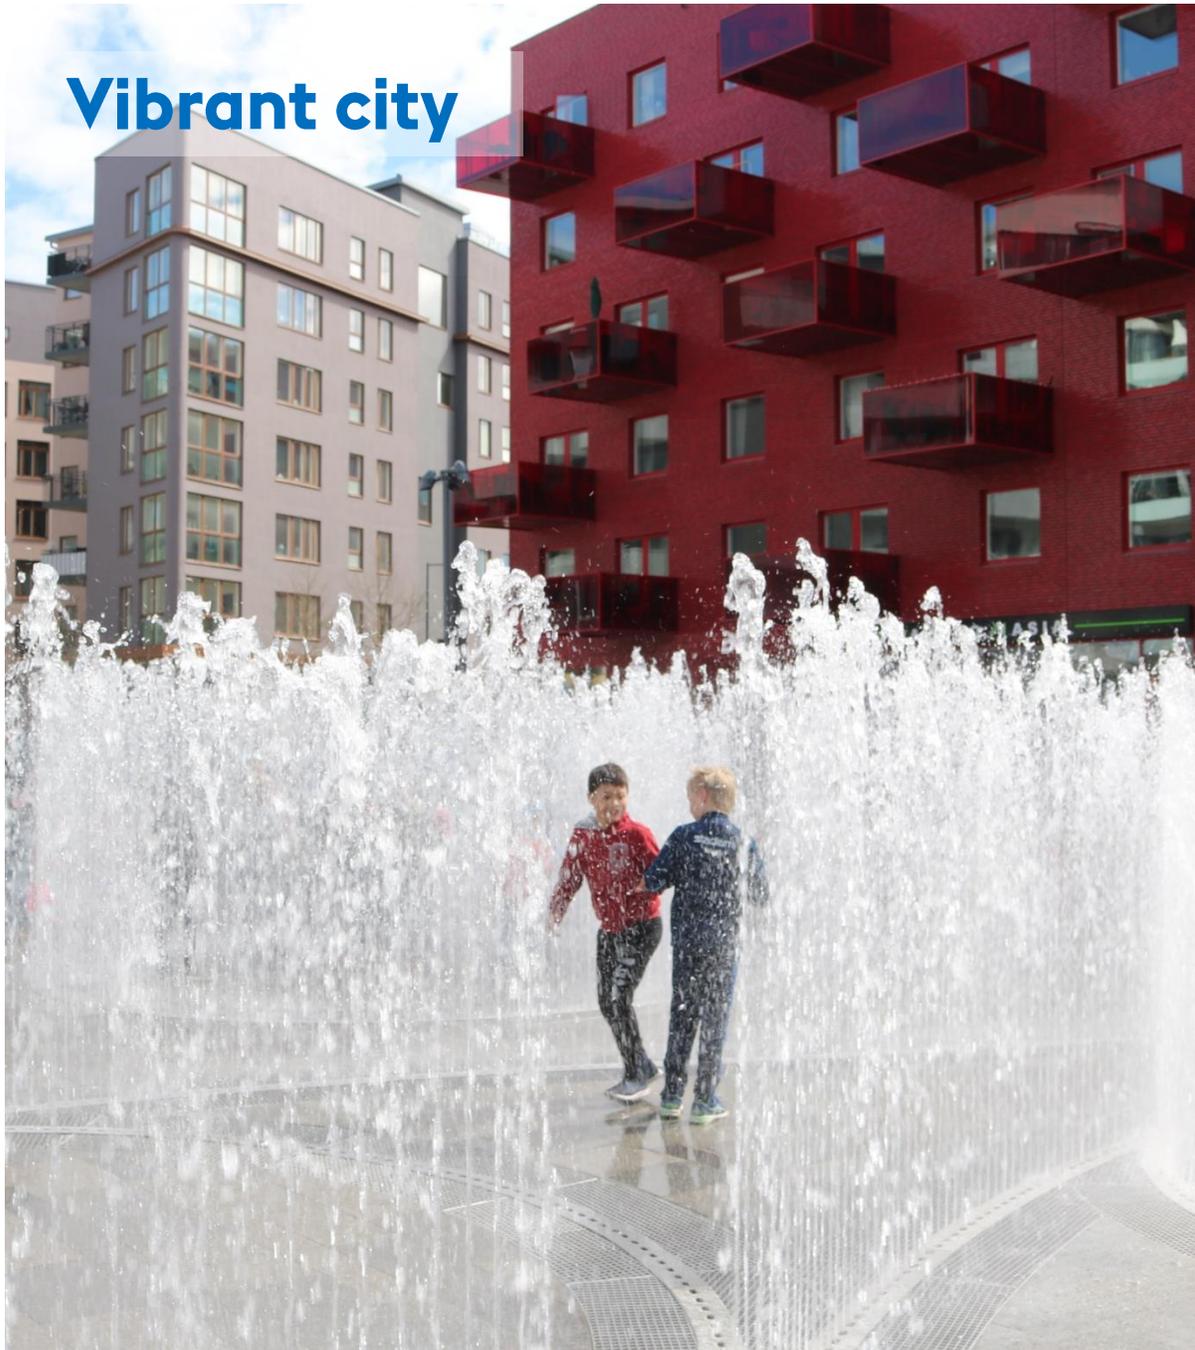

Här fångas in koldioxid atmosfären

Det här är vår testanläggning för att fånga in koldioxid. En fullt utbyggd anläggning tillsammans med geologisk lagring skulle kunna fånga in potential och skulle under en testperiod fånga in 800 000 ton koldioxid, vilket motsvarar utsläppen från all biltrafik i Stockholm.

#bioCCS #BECCS

Vibrant city

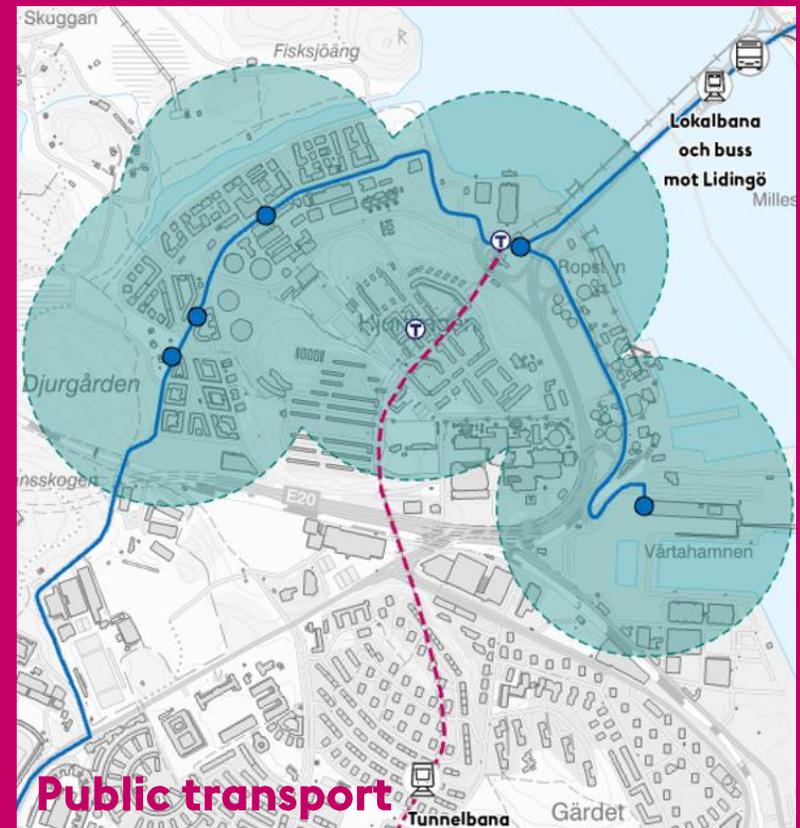

So far we have built:

- ✓ **3 160 dwellings, 52% rental apartments, 8% student accommodations.**
- ✓ **4 squares, 11 parks and playgrounds**
1 elementary school, 10 preschools,
1 sports hall, 1 library
- ✓ **8 buildings** in Gasverket have been transformed and given new life and purpose.

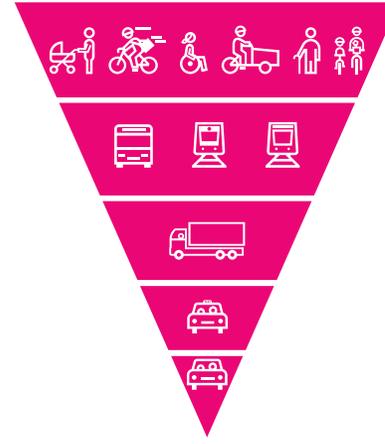

“The 5-minute city”

Accessibility & proximity, traffic hierarchy, multifunctional streets

Key figures:

- ✓ **8 000 bicycle spaces** and 1 900 car parking for 7 000 residents.
- ✓ **The area is served by metro, several bus lines, and electric commuter ferry**

Participation & learning

✓ **4 400 community builders**

have participated in capacity building development

✓ Around 40 research, development, and innovation projects have been conducted.

About **10 are ongoing in areas such as citizen engagement and positive energy districts.**

✓ **50 000 study visitors**

from 120 countries have visited the project. 4 250 study visitors i 220 groups visited in 2022.
